WILLIAMS' MOST EXPL

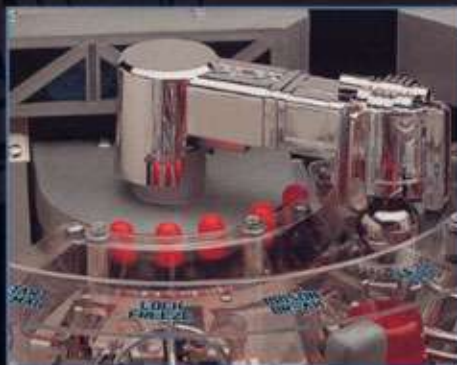

Gun handle grips control the Cryo-claw and flippers for two-fisted pinball fury.

Once it's loose, there's no stopping DEMOLITION MAN. From the first ball to the last blast, this is high-caliber, rapid-fire pinball.

The battle begins the moment players grab on to the two-button gun handle grips. These all-new controls for flippers and DEMOLITION MAN's Cryo-claw also feature secret button/trigger combinations for added scoring.

Once activated, players can direct the Cryo-claw to initiate one of five exclusive play modes—Start Superjets, Prison Break, Capture Simon, Acmag Combat or Freeze Ball for four multi-ball equences.

The player-controlled magnetic Cryo-claw begins one of five exclusive features.

DEMOLITION MAN's two- to five-ball multi-ball sequences represent John Spartan's and Simon Phoenix's four major battles in the Fortress, Museum, Wasteland and Cryo Prison. With every sequence completed the stakes rise higher and higher until they reach the seven-jackpot finale.

The miniature car crash is just one of several industry firsts loaded into DEMOLITION MAN.

EXPLOSIVE PINBALL EVER.

But the action doesn't stop there. Two industry firsts ensure that DEMOLITION MAN will make pinball history: an actual miniature car crash builds point values, and the side-mounted gun grips feature two sets of buttons to control flippers and the Cryo-claw.

Music from the DEMOLITION MAN soundtrack, custom speech by Stallone and Snipes, and blow-out sound effects are all presented with DCS™ Sound System clarity, making DEMOLITION MAN appealing to first-time players. And Williams engineering keeps it challenging for even the most experienced pinball enthusiast.

DCS
SOUND SYSTEM

San Angeles blazes, cars crash and burn, and more in DEMOLITION MAN's explosive Dot-Mation scenes.
