

RED TED'S ROADSHOW

Featuring Country Western star

Carlene Carter

as the voice of "Red."

**It's a big country...
Someone's
got to
tear it up!**

It's literally California or bust when this "Road Crew from Hell" takes to the highways in a runaway bulldozer. And with two PinMation™ characters, dual plungers and Carlene Carter as the voice of Red, who wouldn't want to go along for the ride?

When it comes to wreckin' road, two heads are better than one.

DCS
SOUND SYSTEM

Diverter switch directs ball to alternating ramps (① & ②) during "bridge out" sequence.

The playfield features an open and uncluttered layout. Players will enjoy the easy, kinetic flow from ramp to ramp. Operators will appreciate the easy accessibility for service and cleaning.

Hit the road with RED AND TED'S ROADSHOW™. You're guaranteed a good time because Red and Ted are the new, more advanced versions of Williams' blockbuster PinMation™ concept and cousins of FunHouse's Rudy.

With real hair and eyelashes, Red and Ted are the second generation of Williams' successful PinMation concept.

Carlene Carter is the voice of Red, a brassy country girl with a heart of gold and a free-wheelin' way with a bulldozer. Ted is her two-steppin' partner, a good guy with a bad road-side manner. Both keep up a near-constant commentary with players and each other as they travel west to California, looking for fun and finding trouble in 18 different cities. They crush a few cabs in New York, party at Mardi Gras in New Orleans and meet monsters in San Francisco, trashing pavement every mile of the way.

Williams' latest SuperPin™ also features four flippers and two plungers—one for a skill shot that sends a ball flying towards Ted's hard hat. There's plenty of three-ball multi-ball excitement, wild dot-mation sequences, and a rainstorm and explosions with enough power to shake the game and rattle players. And Williams' DCS Sound System™ never sounded better than when Red sings Carlene Carter's hit "Every Little Thing."

There's a lot to see and do in RED AND TED'S ROADSHOW—more than one player can get to in a single game. That's why we've added a buy-in feature to keep 'em coming back for more, and more...which is exactly what you can count on getting with RED AND TED'S ROADSHOW.

The left-side plunger launches the ball on a skill shot that cracks Ted on the head.

PinMation™ is back!
