Set your sights on a winner!

"Do you feel lucky?" You should. Because **DIRTY HARRY** just arrived on the scene. He's packing his famous .44 Magnum, a steely take-charge attitude, and a long list of players' most wanted pinball features.

The first is a top-loading reproduction .44 Magnum. This industry-first playfield component takes aim at skill shots and features, and shoots rapid-fire pinballs into the action. Plus, two molded miniatures—a safe house and warehouse—award valuable bonuses.

The molded safe house and warehouse dominate the playfield's skyline. Players brave enough to enter will be rewarded with hurry-ups, extra balls, four-ball multi-ball, power-up contraband items, magazine awards, the "Feel Lucky" sequence, and more.

In the "Feel Lucky" mode, players can go after big points or take a shot at special awards. They'll also break up barroom brawls, chase getaway cars, defuse letter bombs, meet the mob or stop madman Scorpio's reign of terror.

Anyone left standing after all that action can face an all-out "Crime Wave" with unlimited autofeed multi-ball action.

DIRTY HARRY's .44 Magnum is the most powerful handgun in the world. This gun can be armed when facing any direction, and fired automatically or under player control.

It's awesome pinball power, designed for maximum player appeal, maximum operator earnings and profit. And Williams loads it all into a high-impact cabinet that will arrest players in even the most mobbed locations.

Plus, a DCS Sound System™ pumps out original music, sound effects and custom speech by Clint Eastwood with high-caliber force.

So answer the question. "Do you feel lucky?" You will when you get **DIRTY HARRY**.
