Just Add Guts

With its molded skull, hyper jump ramp, radical attitude and high-speed playfield, NO FEAR: DANGEROUS SPORTS® is extreme pinball.

NO FEAR: DANGEROUS SPORTS pushes today's most daring sports to the limit. Free climbing, water skiing, super-cross, extreme skiing, auto racing and more in air, snow, asphalt, dirt and water. The talking skull shouts out shot instructions as players face 2-, 3- and 4-ball multi-balls; whip through the easy-to-repeat loops, speed over the magnetic accelerator and take a flying leap across the jump ramp's void.

Engineered in response to input from players and operators, NO FEAR: DANGEROUS SPORTS has the goods. Easy-to-follow shot lights and auditory cues. DCS Sound System™ speech, sound effects and original music. Fiery backglass and cabinet graphics. And dot-matrix animation featuring super-cross hero Jeremy McGrath, extreme skier Glen Plake, water ski jumper Sammy Duvall, driving daredevil Robby

Gordon and free climber Dan Osman. NO FEAR: DANGEROUS SPORTS. A little danger makes it a lot of fun.

After screaming through the magnetic accelerator, players can hit the right flipper to fly across the jump ramp. Wimps can do nothing and avoid the challenge.
